

Trofodermin®

What is it?

Trofodermin® is a cream and spray used to treat cuts, burns, wounds and other skin conditions.

It contains clostebol, a substance that is prohibited at all times under the [WADA Prohibited List](#).

Trofodermin® is sold over the counter in Italy and in some parts of South America.

Protect Yourself

- Always check the ingredients before using any medication or skin cream.
- If you are unsure whether a product is safe, consult your doctor.
- Never share medications with other athletes or support personnel.
- Keep a record of any medications you use, including receipts and, where possible, the product packaging.

Stay Informed

Using Trofodermin® can lead to an Anti-Doping Rule Violation (ADRV).

You are responsible for what enters your body. Under the Principle of Strict Liability, athletes are responsible for any prohibited substance found in their body—even if it was taken unintentionally.
